PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Backend/Full-Stack Developer with practical experience in building robust, scalable web applications and RESTful APIs. Recently completed a 3-month Junior Developer role (OJT) at a Japan-based software house, gaining hands-on experience in team collaboration and technical guidance. Proficient in Node.js,React.js, Prisma, and MySQL, with a strong foundation in core software engineering principles (SOLID, OOD, UML). Actively utilizing containerization tools like Docker to streamline development workflows.

SKILLS

Frontend
HTML5, CSS3, JavaScript (ES6+), React.js, jQuery, Bootstrap, Tailwind CSS

Backend
PHP, Laravel, Java(Servlets, JSP), Node.js, Express.js, Next.js

Database/ORM
MySQL, MongoDB, Prisma

Methodology
Object-Oriented Design (OOD), SOLID Principles, UML (Use Case, Sequence, Class Diagrams), Design-to-Code Approach

Core Concepts
Data Structures & Algorithms (DSA), Advanced Database Concepts

ML & Data (Future Focus)
Python, scikit-learn, TensorFlow, Pandas

DevOps & Tools
Git/GitHub,Basic Docker, Basic Linux CLI

Professional Experience

Junior Developer (OJT) | Japan-based Software House 04/2026 – 07/2026
Yangon

- Traced database queries and utilized internal testing tools to verify application logic across screens for large-scale projects.
- Mentored training course students by explaining programming concepts, debugging code, and ensuring project alignment.
- Collaborated effectively with team members on educational projects to ensure successful development and delivery.
- Gained valuable professional experience adapting to a multicultural corporate environment and global team dynamics.

PROJECTS

Niyama Online Exam Proctoring and Anomaly Detection System

- **Technology: Java (Spring Boot REST API) and React Frontend.**
- **Key Features:** Implemented client-side anomaly tracking (mouse clicks, Ctrl+C/V, tab changes) and a complex **Rule-Based Backend Logic** system for anomaly review and status updates (e.g., "Confirmed Cheating")
- **Methodology Highlight:** Utilized a Design-to-Code approach (UML/Sequence Diagrams), modeling the entire structure to ensure efficient handling of examination logic and system scalability.

https://github.com/akwhtun/ni-ya-ma-api

Computer University Course Registration System

- **Technology: PHP Backend, React Frontend, and Tailwind CSS.**
- **Key Feature:** Built a custom solution to manage student course registration and grades throughout the semester.

https://github.com/akwhtun/course_registration_system

Amono Online Shop

- **Technology: Java, JSP, Servlets, and MariaDB.**
- **Key Features:** Developed a fully functional e-commerce platform with distinct user roles (Admin, Business Owner, Customer, Guest). Implemented a complex approval workflow for product posts and managed order history/account suspensions.

EDUCATION

Bachelor of Computer Science (B.C.SC), *University of Computer Studies, Mandalay* 2023 – 2026
Note: Transferred from University of Computer Studies, Pakokku (2018-2022).

CERTIFICATES

Fullstack Developer Course
Codelab | [16/10/2022]

Algorithmic Toolbox
University of California San Diego | [Jul 5 2025]
